

M R/ President

Ladies and Gentlemen

First of all , I want to express my kind gratitude and affect for the committee supervise the conference that includes the elites of politicians scholars and in addition my gratitude and thank for our friend <> , for both government and citizens and to satisfaction for the kind relation between , Uganda Korea and all the countries participated in the conference.

Ladies and Gentlemen,

Does the world without man have a value? Does man without awareness, creativity or will have a value? Does man without independent and sovereignty have a value? Was man born to be a slave? I can discern a big 'No' flashing in your eyes. Again, I have to ask you: Does man enjoy safety more than any other creature on the planet? Are the masses the champions of revolution and construction? The answer is Yes. Within this context, man is the only creature, who has the potential to control his destiny. The masses are the unchallenged champions of the revolution and construction. These answers constitute the core of Juche, which was initiated by President Kim-II sung. Juche was developed by great leader Kim-jung Il and completed by field marshal Kim-Jung Un. Kim-II Sung's Juche helped the nation soar to the sky. Nations in our continent, which helplessly suffered from slavery and oppression, need the light of Juche. Our content was the big prize of colonial governments, which divided the nations between them

Ladies and Gentlemen

We are now living in a world, in which man is being trampled under heavy boots; a world controlled by the law of jungle; a world, in which the weak has no place; no dignity for any one, who does not posses power. Therefore, the genius Kim-Jung Il introduced his Songun, which is the policy of dignity and pride. Songun, which gives military affairs top priority in the construction of a powerful and impregnable, highlights the people as the nucleus of the armed revolutionary struggle. Sure, Songun is a new approach of political theories. It is known that

Juche is a new chapter of philosophical thought, which placed the masses on the proper track of revolutionary struggle.

Ladies and Gentlemen

Would you appreciate my call for celebrating Juche and Songun in our African continent. We can make the best use of the two theories. But, why do we need Juche and Songun? The simple answer is that Juche honours man and deepened his independence, Are we free nations ? , which could steer their destiny without receiving orders from the US White House? Do you grow what we eat? Do we manufacture what we use? The most important question is: do we manufacture the weapons we use to defend ourselves? It is a disgrace that our defence weapons are imported from the US and Western countries. It is an irony that we fight our enemy by weapons manufactured by the enemy. Our enemies export to us obsolete and old fashion arms. It is a disgrace that the West is or exporter of arms; worse, the West trains our armies to use its weapons. The West pays cheap price to buy metals used for manufacturing weapons

Ladies and Gentlemen

Let's go back again to Juche. What sins did the democratic state of Korea do? Is it a sin to create a nation fully aware of its freedom and independence to defy the American Imperialism. Some people would ask me: is North Korea as powerful as the US? The answer to this question lies within the fact that the strength of a state is not only based on its geographical area, the population or the economic power. It is the military power, which is the most influential and decisive in this respect.. Our Continent has been divided to small states; the debased occupation regimes drew our borders only to provoke struggles, differences, and water disputes across the continent. Worse, a state was divided into two sub-states. Everyone of us is now gripping at the neck of the others. our continent is very rich, African people are starving to death. Why?

Ladies and Gentlemen

All African nations are members in the UN, which is supposed to guarantee international peace and security. Five big countries, which won victory in the Second World War, controlled the international organization,. Other members in the United Nations are playing the role of supporting actors. Should we compare such a system to justice? The UN has lost its credibility. To make matters worse, the UN became a sword threatening the neck of states seeking independence and dignity. The US is holding a stick to hit countries, which refuse to give in. the UN employs double-standard policy

Ladies and Gentlemen,

I paid several visits to the demarcation line in Panmunjom. I discovered that Korean people on both sides are aiming guns at each other. People in our African continent are doing likewise. This hostile atmosphere is created by the American. During my visits to Panmunjom, I saw American soldiers stand side-by-side with South Koreans, and both are aiming their weapons at the North. This scene reminded me of the American troops in Iraq, Afghanistan, Pakistan, Vietnam, Arab Gulf countries and Latin American countries. Please, have a look at the world map, which is stained with the blood of innocent people. This calamity is the made by the US Devil. The sight of American soldiers in Panmunjom, driving me insane. I screamed at an American soldier, asking him: "Why are you here?" Is this the land of your forefathers? The Americans should be remembering the Korean war. Since then, the bodies of the American soldiers have been buried under the feet of the Korean people only to remind the American nation of its scandalous defeat in the Korean land. Death is waiting for you the Americans. Korea is not Iraq.

Ladies and Gentlemen,

We have to follow Songun, which, in addition to its military impact, is an engine of economy and science, and all other fields. Due to Songun, Korea has made military, diplomatic, economic,. Field Marshal Kim-Jung Un belongs to the family of Juche and Songun, Kim-Jung Un belongs to a revolutionary family of Kim-Hyong Jik, President Kim-Il Sung and great leader Kim-Jung Il. We declare our solidarity with the Korean people because they are fighting for justice. A few great brave

people are now calling for peace in our world. These peace-champions are pioneered by the Korean revolutionary family. I would like to tell the US President Barack Obama, who is of African origin and law graduate, that your law studies should have prevented you to launch destruction on the Planet. I would like to ask Obama about that kind of law, which compels him to send the American troops to foreign land. President Obama must be knowing that his cousins in Africa are starving to death as a result of the Us White House policy.. I advise you, Obama, to learn the lesson from history, which testifies that the US is the kingdom of terror.. You, Obama, should tell your soldiers that death is waiting for them.

Dr. Yehia Khairolla,

Deputy chairman of the International African Committee of Juche Studies, and the chairman of the Egyptian Committee of Juche Studies
