

**PRESENTATION OF SOUTH AFRICA'S STUDY GROUP ON PROGRESSIVE IDEAS TO THE AFRICA REGIONAL CONFERENCE IN UGANDA. 11-04-2013**

**TOPIC: Juche idea is a fresh philosophical idea centered on man. Lessons for independent transformation of Africa.**

Comrades chairperson of the session, fellow revolutionaries and Juche scholars from across the globe, representatives of the DPRK representing their great leader and masses of the Korean people, friends, combatants and compatriots, receive warm and revolutionary greetings from your fellow compatriots from South Africa. It is a great honour to be invited again to this kind of conference where we believe it is a great opportunity to share experiences and exchange ideas on how to totally emancipate the millions of the masses still entrapped in various forms of Capitalist brutality. We are greatly humbled and thus would like to present our views guided by the theory and philosophy provided by our views guided by the theory and philosophy provided by the Juche Idea which assisted and propelled the Korean people through their revolution to the freedom which they are presently enjoying and therefore content with.

The Juche idea puts man at the centre of any form of change and transformation of the world order. It is thus imperative of us as Africans in particular to realize how important we are and how integral is this idea to the independent transformation of our continent has for time immemorial being subjected to political, economical and social subjugation by foreign forces to be precise the Capitalists Draconians . We thus have a duty to inculcate into our peoples minds that they are born independent, creative and with full consciousness . They are therefore critical in designing their own destiny led of course by correct leadership. The time for lamenting has passed we now need to act decisively as our people can no longer take the atrocities meted to them by this inhuman, catastrophic Capitalist order in its various forms. The true independents and development oppressors who form time to time change form and strategy to further subjugate us to horrendous living conditions.

We therefore call upon to our fellow African Compatriots in this conference to join hands and architect the real free, independent , prosperous peaceful Africa. Lets engage on a continuous basis, shape up our common ideology guided by the correct theory and philosophy as espoused in the Juche idea. Let us also condemn the bully-boy tactics that the crumbling USA is currently pursuing against the Democratic People's Republic of the Korea utilizing their lapdogs in South Korea. The unification of the Korean people is Sacrosanct and can never be delayed.

Long live the freedoms enjoyed by the Korean people in the DPRK long live. Forward with the independent transformation of Africa, forward.

**THANK YOU.**
